FOREWORD

This is the fifth annual edition of the Proceedings of the Social Statistics Section of the American Statistical Association.

This 1962 issue includes nearly all of the papers and discussions (a few of them in summary form) that were presented in the 13 sessions sponsored by the Social Statistics Section at the Annual Meeting of the American Statistical Association in Minneapolis, September 7-10, 1962. The pages in this volume are mainly photographic reproductions of manuscripts provided by the authors. Their specific contents have been edited only by the authors, and may still be in a form preliminary to recasting for formal publication elsewhere.

On behalf of the Social Statistics Section we express gratitude to the authors of the papers, the discussants, and the chairmen of the sessions. President Philip M. Hauser and Secretary-Treasurer Donald C. Riley have given active support to the project, and Office Manager Edgar M. Bisgyer and his competent staff have been responsible for the major share of the labor in producing the publication.
