Foreword

This is the ninth annual edition of the Proceedings of the Social Statistics Section of the American Statistical Association.

This 1966 issue includes all of the papers and nearly all of the discussions that were presented in the 19 sessions sponsored by the Social Statistics Section at the Annual Meeting of the American Statistical Association in Los Angeles, August 15-19, 1966. The number of sessions and papers represents a notable increase in content, previous editions of the Proceedings having covered no more than 13 sessions. The pages in this volume are mainly photographic reproductions of standard-format typescripts provided by the authors. Their specific contents have been edited only by the authors, and may be in a form preliminary to recasting for formal publication elsewhere.

Acknowledgment is due to the participants in the sessions for their cooperation in providing the materials and to ASA Manager Edgar M. Bisgyer and Mrs. Jean Smith and Mrs. Dorothy Zimmermann of the office staff for their work in compiling and arranging for the printing of the volume.
