Impact of Gulf Hurricanes on the National Immunization Survey

Kirk M. Wolter¹, Jim Singleton²
NORC and the University of Chicago¹
National Immunization Program²

Today’s Agenda

• Basic Elements of the NIS
• Overview of the NIS in 2005
• Sample Distribution in 2005
• Immediate Impacts of Hurricanes on Data-Collection Operations
• Lasting Impact of Katrina
• Estimation for 2005
• Closing

Overview of the NIS in 2005 – cont.

• Data collection launched in February 2005
• National Survey of Children with Special Health Care Needs (SLAITS survey) launched in April
• Cut-back to 56 areas in June (due to budget reduction)
• Restoration of budget
• Gulf hurricanes interrupt data collection
• Large sample in 4th quarter finished in February 2006

Basic Elements of the NIS

• Eligible population = all children age 19-35 months living in the US
• Sampling frame = telephone numbers in 1+ banks
• Sampling design = RDD with geographic stratification by 83 areas (states, cities, and rest-of-state areas)
• Four quarterly samples with continuous interviewing operations throughout the year
• Telephone interview of parent of eligible child
• Provider record check

Overview of the NIS in 2005

• 83 sampling IAP areas (78 + 5)
  • Rotating in
    – San Bernardino County, CA
    – Alameda County, CA
    – Denver, CO
    – St. Louis, MO
    – Clark County, NV
  • Rotating out
    – San Diego County, CA
    – Santa Clara County, CA
    – Miami-Dade County, CA
    – Marion County, IN
    – Boston, MA
• 78 estimation IAP areas

Sample Distribution in 2005

Immediate Impacts of Hurricanes on Data-Collection Operations

• 2005 Atlantic hurricane season was most active on record
• 26 named tropical storms
• 3 hurricanes reached category 5 intensity
• 4 major hurricanes had substantial impacts on the operations of the NIS
Immediate Impacts of Hurricanes on Data-Collection Operations – cont.

- RDD operations interrupted by Dennis, Katrina, Rita, and Wilma
- Sources of information
  - Media reports
  - National Hurricane Center
  - Bell South
  - BRFSS managers
- Decisions to suspend and resume telephone interviewing operations

Lasting Impact of Katrina

- Katrina made landfall August 29 on the Louisiana/Mississippi coast
- Primarily affected 11 IAP areas
  - Orleans Parish
  - Rest of Louisiana
  - Mississippi
  - 2 areas in Alabama
  - 3 areas in Florida
  - 3 areas in Tennessee

Lasting Impact of Katrina – cont.

- Louisiana and Mississippi
  - We suspended telephone interviewing operations for Q3
  - Partially resumed telephone interviewing operations in Q4
  - FEMA maps used to control closing and opening of telephone operations

Lasting Impact of Katrina – cont.

- Orleans Parish designated a rotating IAP area for 2006
- Telephone interviewing finally resumed in Orleans Parish in Q2 2006
- Concern about the provider component of the NIS – lost records?
- Beginning in Q2, we ask respondents sampled in Orleans Parish or Rest of Louisiana for consent to contact the immunization registry
Lasting Impact of Katrina – cont.

- Residence rules
  - Wording of the questionnaire “... living or staying in your household?”
  - Interviewers given instructions to follow passive approach

Estimation for 2005

- Standard estimation procedures, except for Orleans Parish and Rest of Louisiana
- Estimation only for statewide Louisiana

- Orleans Parish
  - Q1 & Q2 only
  - 30 children with reported provider data
  - 87 children with missing provider data
- Imputed missing provider data for the 87 children
  - Log-linear model used to predict provider up-to-date status on the basis of household up-to-date status
  - Matching to donor pool of children in Louisiana with adequate provider data
  - Hot deck imputation for all specific provider-record-check items

Closing

• **General Point:** At the very time of society’s greatest need for good information, our capacity to produce such information is the most impaired

• **Specific Point:** Katrina highlighted a limitation of RDD surveys in natural disasters characterized by interruption of telephone service and displacement of the population

• **Other Methods of Data Collection:** Immunization registries and face-to-face enumeration

**Keywords:** NIS, National Immunization Survey, Immunization, Survey, RDD, Katrina, Imputation, Log-Linear Model
